CEAP Classifications

CEAP is a system created to classify extent of venous disease. There are several criteria, for the purposes of specialist referral, a visual assessment is all that is required.

C1
Telangiectasias
and reticular
veins

C2
Varicose veins

(Visible bulges
when standing)

C3
Edema and
corona

(edema to
ankle, spider
veins to medial
ankle)

C4a
pigmentation/eczema

C4b (pictured above)
Lipodermatosclerosis

(or atrophie blanche)

C5
Healed ulcer

C6
Active ulcer
